# 1 A guide to this manual

## 1.1 Introduction

Deltares has developed a unique, fully integrated modelling framework for a multi-disciplinary approach and 3D computations for coastal, river, lake and estuarine areas. It can carry out simulations of flows, sediment transports, waves, water quality, morphological developments and ecology. It has been designed for experts and non-experts alike. The Delft3D framework is composed of several modules, grouped around a mutual interface, while being capable to interact with one another.

This manual describes how to install the software and the License Manager.

**Chapter 2: Introduction**, provides specifications of the software supplied.

**Chapter 3: Installing Delft3D on Windows**, explains the installation of Delft3D, the manuals and release notes, and tutorials on a Windows OS.

**Chapter 4: Installing Delft3D on Linux**, explains the installation of Delft3D, the manuals and release notes, and tutorials on a Linux OS.

**Chapter 5: Frequently asked questions for Delft3D**, gives an overview of problems and solutions related to Delft3D.

The appendices contain example license files.

## 1.2 Manual version and revisions

A manual applies to a certain release of the related numerical program. This manual applies to Delft3D version 4.04.00.

The manual version number and its release date are given in the page header. Revisions to (a part of) this manual will be indicated by a version number followed by the revision number separated by a dot. The version number is increased when the entire manual is upgraded.

## 1.3 Typographical conventions

Throughout this manual, the following conventions help you to distinguish between different elements of text.

| Example | Description |
|---|---|
| **Module**<br>**Project** | Title of a window or a sub-window are in given in **bold**. Sub-windows are displayed in the **Module** window and cannot be moved.<br>Windows can be moved independently from the **Module** window, such as the **Visualisation Area** window. |

| Example | Description |
|---|---|
| *Save* | Item from a menu, title of a push button or the name of a user interface input field.<br>Upon selecting this item (click or in some cases double click with the left mouse button on it) a related action will be executed; in most cases it will result in displaying some other (sub-)window.<br>In case of an input field you are supposed to enter input data of the required format and in the required domain. |
| <\tutorial\wave\swan-curvi><br><siu.mdw> | Directory names, filenames, and path names are expressed between angle brackets, <>. For the Linux and UNIX environment a forward slash (/) is used instead of the backward slash (\) for PCs. |
| "27 08 1999" | Data to be typed by you into the input fields are displayed between double quotes.<br>Selections of menu items, option boxes etc. are described as such: for instance 'select *Save* and go to the next window'. |
| delft3d-menu | Commands to be typed by you are given in the font Courier New, 10 points. |
| ➤ | In this User manual, user actions are indicated with this arrow. |
| [m s$^{-1}$] [–] | Units are given between square brackets when used next to the formulae. Leaving them out might result in misinterpretation. |

# 2 Introduction

## 2.1 Distributions

### 2.1.1 Windows distribution

For the installation on a Microsoft Windows PC we have provided you with the following files:

⋄ <Install-Shield.exe>, a shell around the Delft3D set-up programs
⋄ <installshield.xml>, template of the text on the install-shield screen
⋄ <Delft3D-Installation_Manual.pdf>, this installation manual.
⋄ <DS_FLEX_User_Manual.pdf>, installation manual for DS_FLEX.
⋄ <delft3d_x64_binaries_hydro_morpho_waq.msi>, the full versoion of Delft3D set-up program to install Delft3D, the User Manuals and the Release Notes.
⋄ <delft3d_x64_tutorial.msi>, the set-up program to install the Delft3D Tutorials used in the User Manuals.
⋄ <MCR_R2013b_win64_installer.exe>, the MATLAB redistributable (MATLAB C Runtime compiler).
⋄ <vc_redist_x64 (2015).exe>, the Microsoft Visual C++ 2015 Redistributable Package (x64).
⋄ <DS_FLEX.exe>, installation program to install the license manager.

⋄ Separate we have sent you an e-mail which contains the license file named <delft3d_*id*.lic>.

All set-up programs will guide you through the required steps needed for the installation, see chapter 3.

When installing the Deltares License Manager, you are asked to specify a license file. This file, <delft3d_*id*.lic>, has been sent to you by email.

### 2.1.2 Linux distribution

For the installation on Linux RHE 4 we have provided you with the following files:

⋄ <Delft3D-Installation_Manual.pdf>, this installation manual.
⋄ <Delft3D-hydro_morpho_waq-$VERSION-$RELEASE.$ARCH.rpm>, the full version Delft3D system, including the License Manager, User Manuals and Release Notes.
⋄ <Delft3D-tutorials-$VERSION-$RELEASE.$ARCH.rpm>, the tutorials for Delft3D.
⋄ <MCRInstaller.bin>, the MATLAB redistributable (MATLAB C Runtime compiler).
⋄ Separate we have sent you an e-mail which contains the license file named <delft3d_*id*.lic>.

All set-up programs will guide you through the required steps needed for the installation, see chapter 4.

### 2.2    Overall structure for Delft3D

On both PC and Linux systems we use a similar directory structure to define the Delft3D package set-up.

Delft3D will be installed in the "installation" directory. This installation directory can be anywhere on the system and it can have any name.

In this directory and its sub-directories the Delft3D package will be installed. In this document the parent directory will be referred to as the "Delft3D home" directory. The name of this directory is stored in an environment variable named <D3D_HOME>. For the definition of the installation directory you should consult your system manager.

For each platform we defined an architecture name and this architecture name is stored in the environment variable <ARCH>. Examples of architecture names are:

◇ x64: Microsoft Windows systems
◇ intel: Linux systems

The directory structure for all Delft3D modules is defined starting with the <Delft3D home> directory, followed by the architecture name and the names of the modules. For example for the D-Water Quality module this means:

◇ %D3D_HOME%\%ARCH%\waq for Microsoft Windows systems.
◇ $D3D_HOME/$ARCH/waq for Linux systems.

The following modules constitute the Delft3D package.

◇ Delft3D-FLOW
◇ Delft3D-WAVE
◇ D-Water Quality (incl. sediment and Ecology)
◇ D-WAQ PART
◇ RGFGRID
◇ QUICKIN
◇ Delft3D-QUICKPLOT
◇ GPP

Additional Delft3D modules are:

◇ Delft3D-TRIANA
◇ Delft3D-NESTHD
◇ Delft3D-TIDE
◇ D-WAQ DIDO
◇ D-WAQ NESTWQ
◇ Delft3D-MATLAB

Finally Delft3D is delivered with the Delft3D-MENU program.

# 3 Installing Delft3D on Windows

## 3.1 Start of the installation

Make sure there is enough disk space for the installation of Delft3D. The complete Delft3D package uses approximately 2.6 Gb (500 Mb MATLAB Compiler Runtime + 600 Mb Delft3D + 1.5 Gb Tutorials) free disk space. Delft3D will come with at least the following files:

◇ <Install-Shield.exe>, a shell around the Delft3D set-up programs
◇ <installshield.xml>, template of the text on the install-shield screen

◇ <installers\delft3d_x64_binaries_hydro_morpho_waq.msi>, the full version Delft3D set-up program to install Delft3D, the User Manuals and the Release Notes.
◇ <installers\delft3d_x64_tutorial.msi>, the set-up program to install the Delft3D Tutorials used in the User Manuals.
◇ <installers\Delft3D-Installation_Manual.pdf>, this installation manual.
◇ <installers\DS_FLEX.exe>, installation program to install the license manager.
◇ <installers\DSFLEX_User_manual.pdf>, installation manual for DS_FLEX.
◇ <installers\MCR_R2013b_win64_installer.exe>, the MATLAB redistributable (MATLAB C Runtime compiler).

◇ Separate we have sent you an e-mail which contains the license file named <delft3d_*id*.lic>.

## 3.2 Installation procedure

To install Delft3D start the installation program <Install-Shield.exe>. After starting the program the window shown in Figure 3.1 will appear.

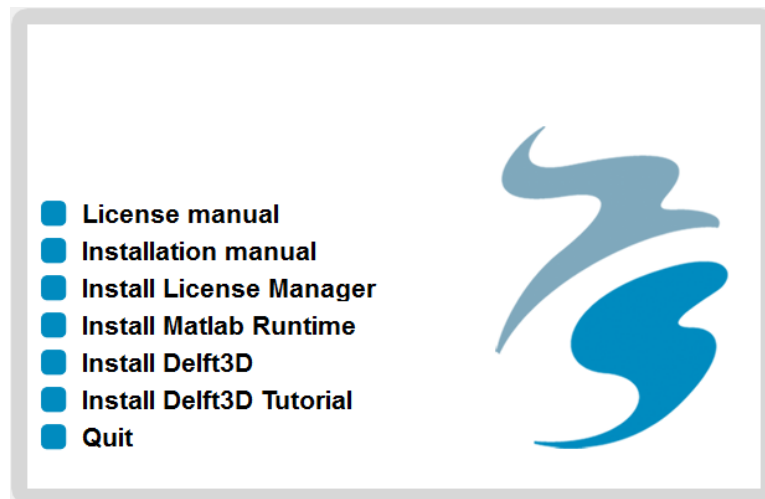

*Figure 3.1: Startup window of the Delft3D installation program*

Figure 3.1 presents an overview of the different components which need to be installed. If the software package is installed for the first time, please install the items listed in Figure 3.1 sequentially. Note that it might be necessary to reboot after a component has been installed. The user is informed when to do so.

The Install-shield, Figure 3.1, contains the following items:

◇ License manual; opens the installation manual for installing a license file.

◇ Installation manual; opens this document
◇ Install License Manager; installs the software for handling license files on your PC.
◇ Install MATLAB Runtime (x86); installs the 64-bit version of Matlab Compiler Runtime R2013b on your PC.
◇ Install Delft3D; installs Delft3D 64-bit version.
◇ Installation Tutorials on Windows; installs the Delft3D tutorials.
◇ Quit; Quits the install shield program.

### 3.2.1 License manual

Click on this item to open de DS_FLEX installation manual. This manual explains how to install different types of license types.

### 3.2.2 Installation manual

Click on this item to open this Delft3D Installation manual.

### 3.2.3 Install License Manager

Click on this item to install Deltares license manager, see the Deltares license manager installation manual (Click on *License Readme*)

### 3.2.4 Install MATLAB Runtime (x86)

Click on this item to install MATLAB Compiler Runtime.

◇ To manually install the MATLAB Compiler Runtime you need the following file <MCR_R2013b_win64_installer.exe>. The file is located on the install medium.

□ Go to the directory where the <MCR_R2013b_win64_installer.exe> file is located.
□ Make sure you got sufficient privileges.
□ Next start the installation of the MATLAB Compiler Runtime by double clicking the executable <MCR_R2013b_win64_installer.exe>.

After starting `MCR_R2013b_win64_installer.exe` the **Self-Extractor** window appears, see Figure 3.2.

*Figure 3.2: WinZip Self-Extractor MCR_2013b_win64_installer.exe window*

After a while the the MATLAB Compiler Runtime environment will appear, see Figure 3.3
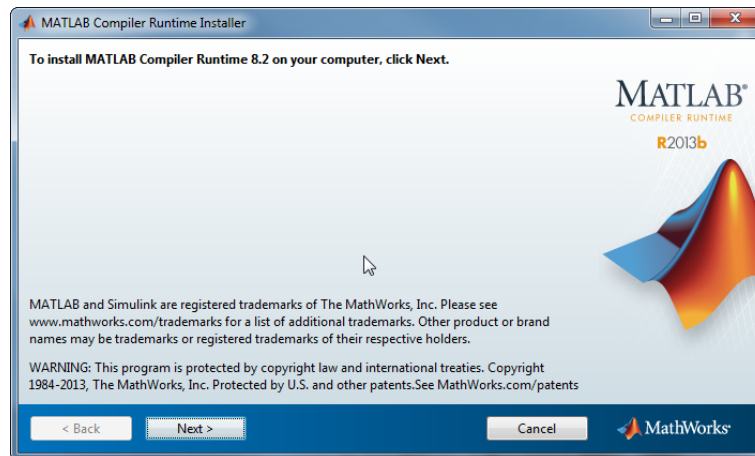

**Figure 3.3:** *Install MATLAB C Runtime environment*

➤ Press *Next* to proceed the installation.

Now the **License Agreement** window appears, see Figure 3.4

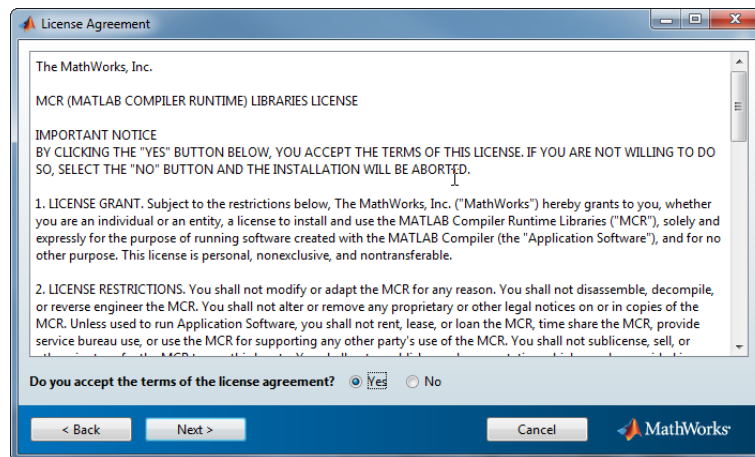

**Figure 3.4: License Agreement** *window*

➤ Select *Yes* to accept the MCR libraries license.
➤ Press *Next* to proceed the installation.

Default, the MATLAB Compiler Runtime will be installed on the
<C:\Program Files\MATLAB\MATLAB Compiler Runtime> directory, see Figure 3.5.
*Figure 3.5: **Folder Selection** window*

➤ Press *Next* to proceed the installation.

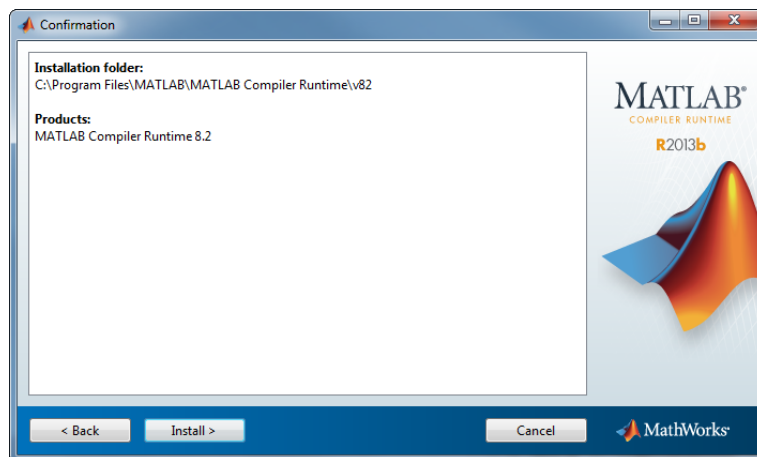

*Figure 3.6: **Conformation** window*

➤ Press *Install* to start the installation.

A progress window shows up in which the installation is monitored, see Figure 3.7. The installation takes several minutes.

*Figure 3.7: Progressbar of the installation*

When the installation is finished, Figure 3.8 appears.

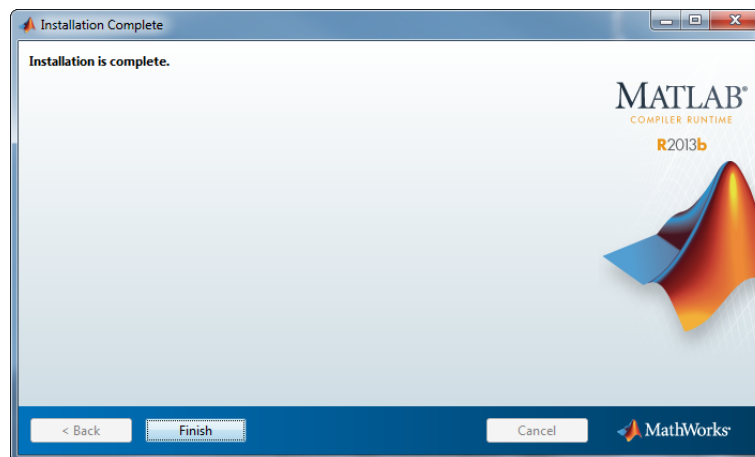

*Figure 3.8: Succesfully installed*

➢ Press *Finish* to exit the installation set-up.

### 3.2.5 Install Delft3D

Click on this item to start the installation of Delft3D by launching <delft3d_x64_binaries_hydro_morpho_waq.msi> now Figure 3.9 will appear

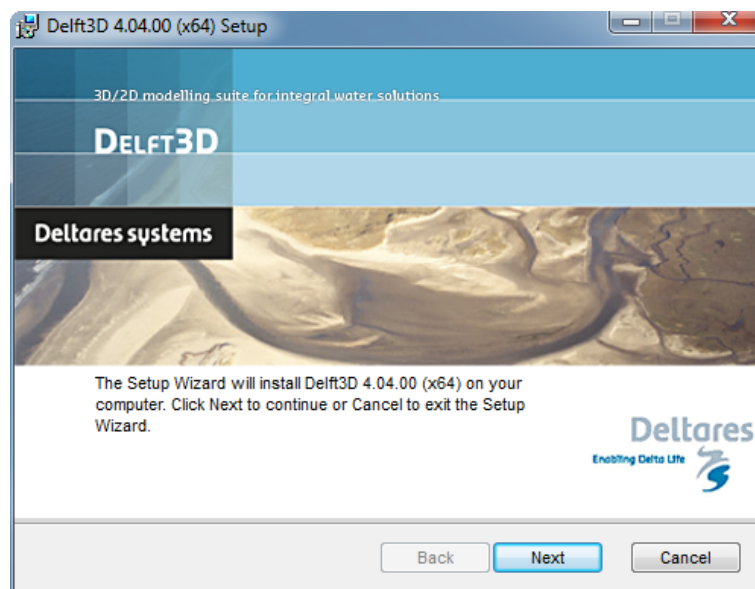

*Figure 3.9: Welcome **Delft3D 4.10.00** window*

To continue the installation, press *Next* in the **Delft3D 4.10.00** window and the license agreement window appear (Figure 3.10).
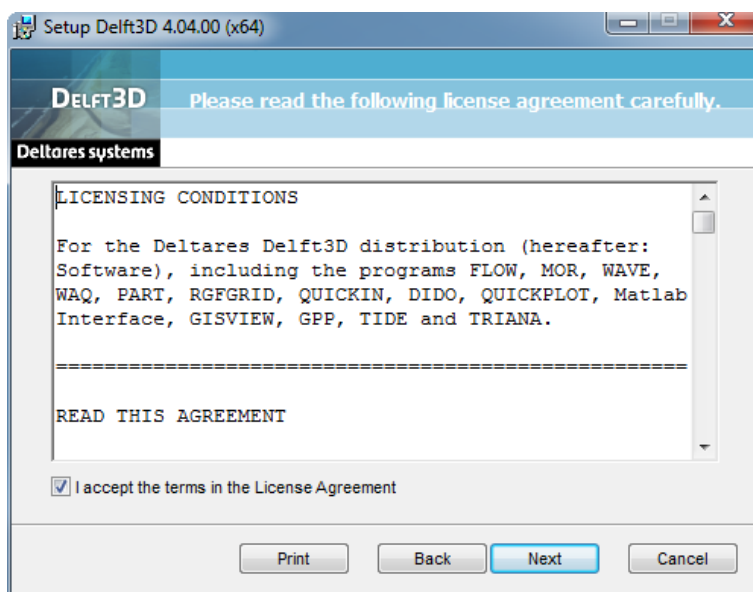

*Figure 3.10: License agreement window*

To continue the installation you first to thick off *I accept the terms in the License Agreement*. Press *Next* to continue.

The window Figure 3.11 will appear

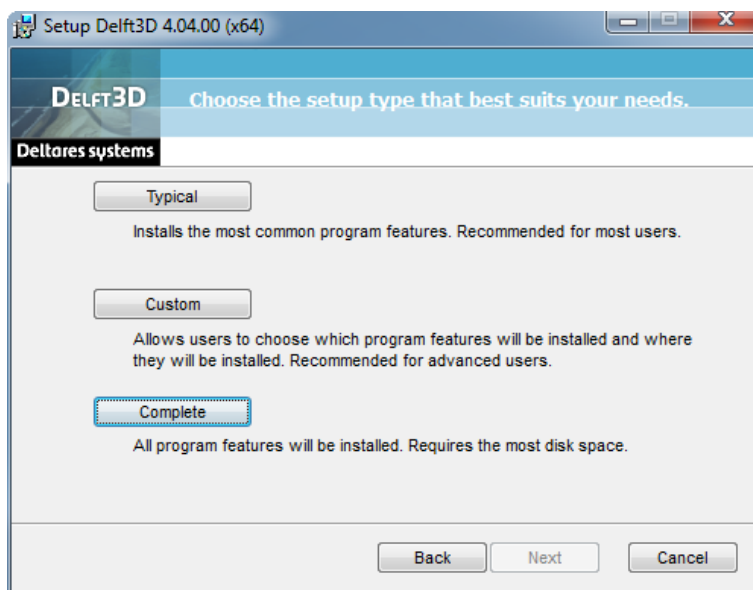

*Figure 3.11: Choose setup type window*

This window contains three items

1 *Typical*
   Selecting this item installs the minimum number of components on to your system on the default location.
2 *Custom*
   Selecting this item enables the user to change default settings, i.e. installation directory, components to be installed, etc.

3 *Complete*
   Selecting this item installs the maximum number of components on to your system on the default location.

Default, Delft3D will be installed on $<$c:\Program Files (x86) \Deltares \Delft3D 4.04.00 $>$ (see Figure 3.12).

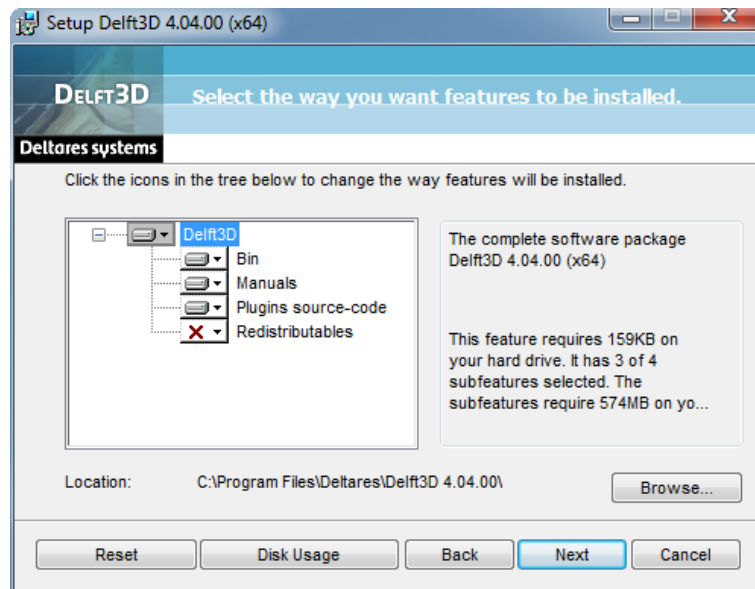

**Figure 3.12: Select features** *window*

If you prefer a different drive and or folder, press *Browse*, see Figure 3.13.

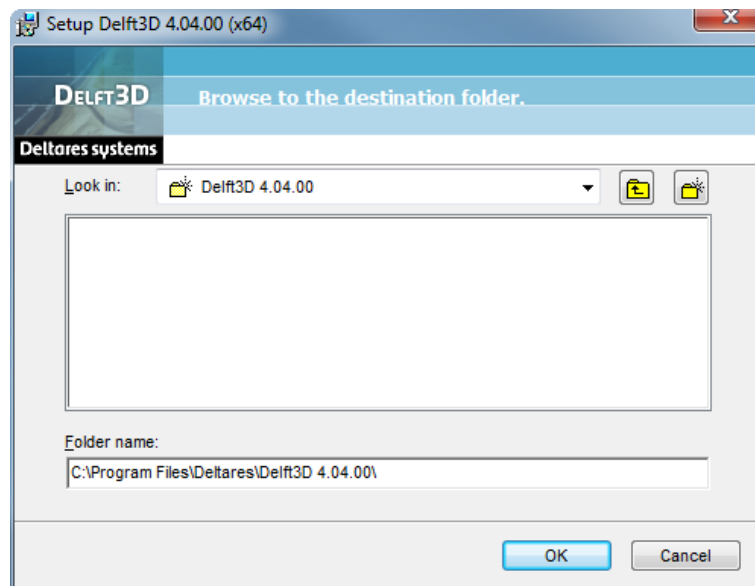

**Figure 3.13: Specify destination folder** *window where to install Delft3D*

➢ Press button *Next*

You are now ready to install Delft3D, press *Install* to initiate the installation, see Figure 3.14.
*Figure 3.14: **Ready to install** window*

Press button *Install*

A progress window shows up in which the installation is monitored, see Figure 3.15.

*Figure 3.15: **Progress** window when installing Delft3D*

The installation takes several minutes. When the installation is finished, Figure 3.16 appears.

Press *Finish* to exit the installation set-up.
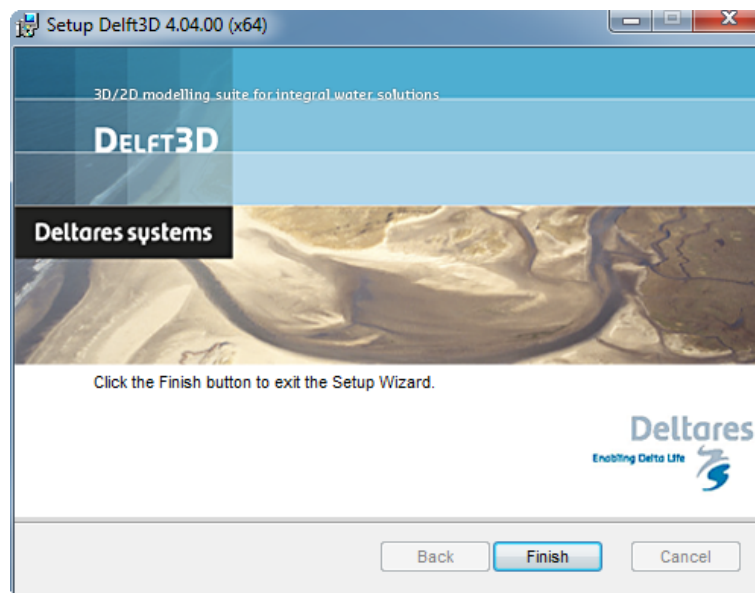

*Figure 3.16: Delft3D installed window when Delft3D is installed successfully*

### 3.2.6 Installation Tutorials on Windows

Most of the Delft3D modules have tutorial examples described in the User Manuals. To install these tutorials click on *Install Tutorial*. The **Welcome** window will appear, see Figure 3.17.

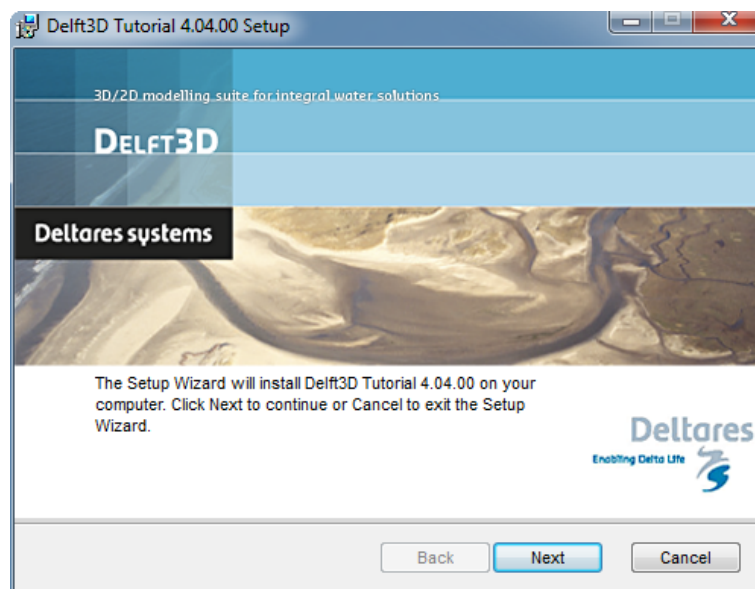

*Figure 3.17: Welcome window when installing the tutorials*

Default, Delft3D Tutorials will be installed in the Delft3D directory. If you prefer a different location, press *Browse*, see Figure 3.18.
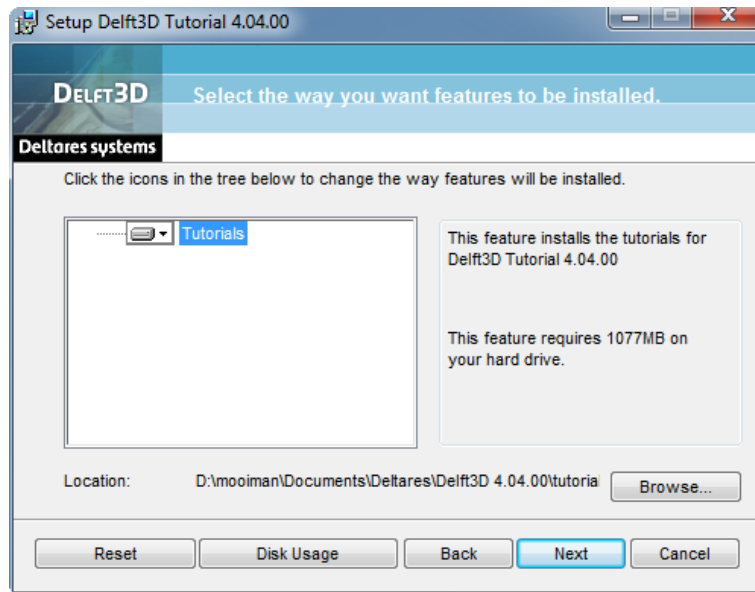

*Figure 3.18: Select feature window*

The **Select Destination Directory** window appears, see Figure 3.19. Navigate to the required folder in which you want to install the Delft3D tutorials and click *OK*.

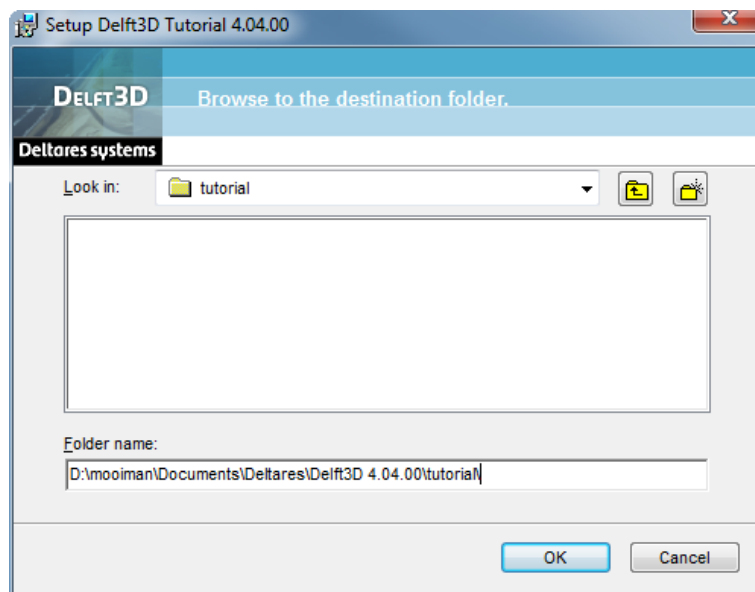

*Figure 3.19: Select Destination Directory window where to install the Delft3D tutorials*

You are now ready to install the Delft3D tutorials, press *Install* to initiate the installation, see Figure 3.20.
*Figure 3.20: Ready to install window*

A progress window shows up in which the installation is monitored, see Figure 3.21.

*Figure 3.21: Progress window when installing the tutorials*

The installation takes several minutes. When the installation is finished, Figure 3.22 appears. Press *Finish* to exit the installation of tutorials set-up.
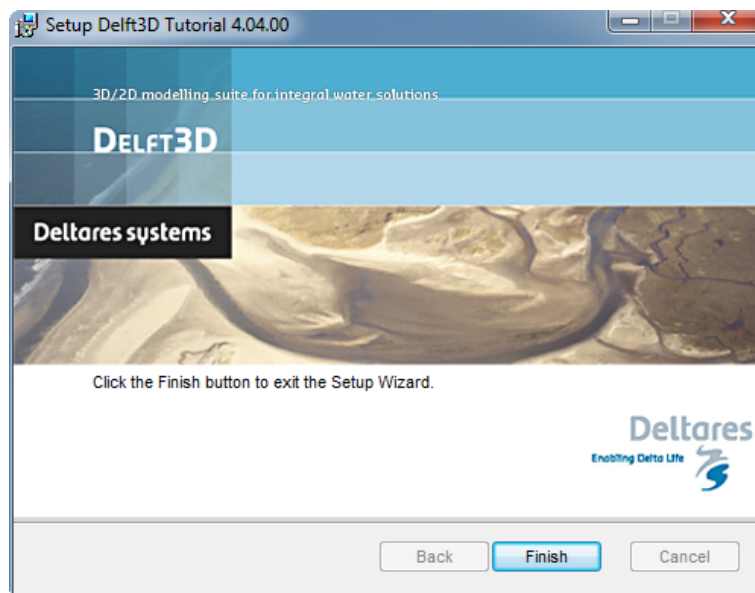

*Figure 3.22: Delft3D Tutorial installed window when Delft3D Tutorials are installed successfully*

### 3.2.7 Quit

Click on this item to quit the Delft3D installation.

### 3.3 Manuals and release notes

As part of the installation also the User Manuals and Release Notes will be installed. They will be available in the folder where you installed Delft3D. See Figure 3.23

*Figure 3.23: Manuals en release notes in Start-menu;*
*Start → All Programs → Deltares → Delft3D 4.04.00*

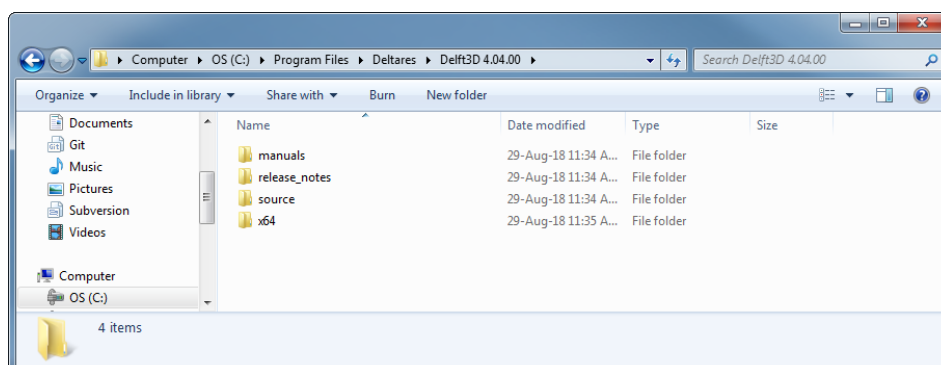

*Figure 3.24: Manuals, release notes, source and binaries in Delft3D folder*

After installation the Delft3D folder contain:

◇ Folder <manuals>, containing the User Manuals in PDF-format for all modules.
◇ Folder <release_notes>, containing details on bug fixes and new functionality.
◇ Folder <source>, containing the plugin sources for Delft3D-FLOW and D-Water Quality.
◇ Folder <x64>, containing the Delft3D system files.

# 4 Installing Delft3D on Linux

## 4.1 Differences with a Windows installation

This chapter describes the installation of Delft3D on Linux.

On Linux the installation program will not ask for the license file, See Section 4.3.1 for details. The Linux license file should be copied to the <delft3d> folder.

## 4.2 Before starting the installation

The installation will be distributed via a ftp-server. The ftp-directory contains the installation for Red Hat Enterprise 4 Linux. The installation of the Delft3D package may be done by anyone with suitable permissions on the Linux system (i.e. system manager), basic knowledge of Linux is required to install the software.

Make sure there is enough disk space for the installation of Delft3D. The complete Delft3D package uses approximately 2.6 Gb (500 Mb MATLAB Compiler Runtime + 600 Mb Delft3D + 1.5 Gb Tutorials) free disk space. Delft3D will come with at least the following files.

◇ <Delft3D-Installation_Manual.pdf>, this installation manual.
◇ <Delft3D-hydro_morpho_waq-$VERSION-$RELEASE.$ARCH.rpm>, the Delft3D system, including User Manuals and Release Notes.
◇ <Delft3D-tutorials-$VERSION-$RELEASE.$ARCH.rpm>, the tutorials for Delft3D.
◇ <MCRInstaller.bin>, the MATLAB redistributable (MATLAB Compiler Runtime).
◇ Separate we have sent you an e-mail which contains the license file named <delft3d_*id*.lic>.

**Remarks:**
    ◇ To check what will be installed, go to the directory where the rpm-files are located and type the command:
    `rpm -qlp *.rpm`
    ◇ Be aware in case you quit/abort the installation that some of the already performed steps, depending on the stage of the installation, should be reversed and/or removed manually.

## 4.3 Start of the installation

### 4.3.1 Installation of Delft3D

**Remarks:**
    ◇ Together with Delft3D, the User Manuals and Release Notes will be installed.
    ◇ The tutorials are delivered in a separate rpm distribution. To install the Tutorials, see section 4.3.2.

Make sure there is enough disk space for the installation of Delft3D. The complete Delft3D package uses approximately 2.1 Gb (600 Mb + 1.5 Gb tutorials) free disk space.
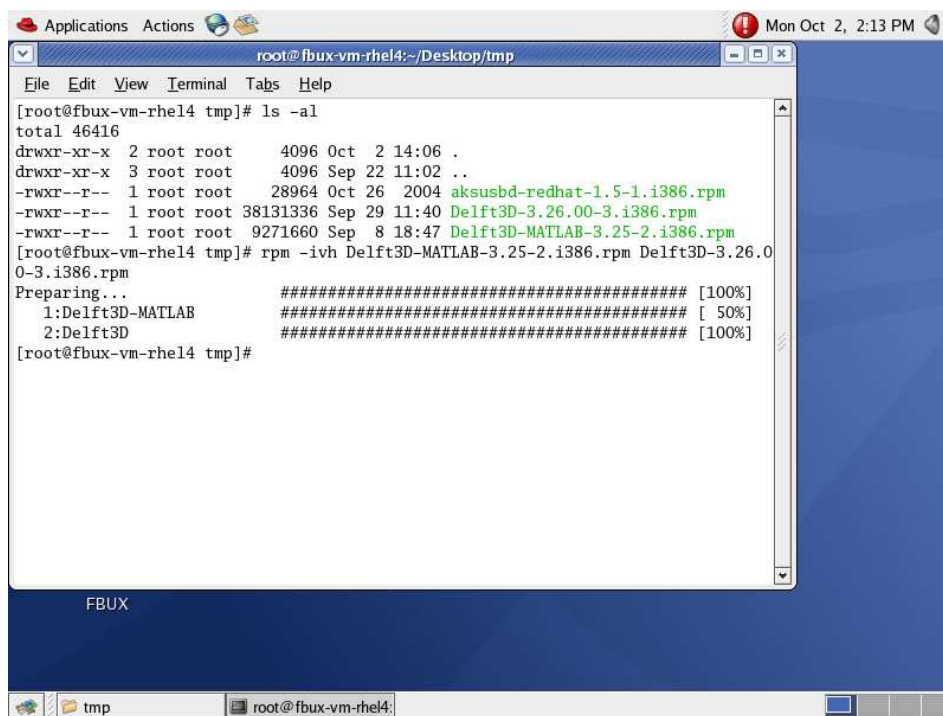

***Figure 4.1:*** *Progress bars to show the progress of the installation*

**Installation using rpm**

Switch to the directory where the rpm files are located, for example:

```
% cd /mnt/cdrom
```

Make sure you have sufficient rights:

```
% su
```

Install the rpm files with the rpm command:

```
% rpm -ivh Delft3D-$VERSION-$RELEASE.$ARCH.rpm
% rpm -ivh Delft3D-tutorials-$VERSION-$RELEASE.$ARCH.rpm
```

If all goes well you will see progress bars showing the installation progress, Figure 4.1.

You always need the license file <delft3d_id.lic> to install Delft3D.

◇ After a new login Delft3D can be used.

**Installation without rpm**

If for some reason you are not able to use rpm the following procedure can be used to install Delft3D.

The rpm-file can be manually extracted using the command:

```
% rpm2cpio Delft3D-$VERSION-$RELEASE.$ARCH.rpm | cpio -idv
```

Place the files in the correct directories. The etc-files should go in the </etc> directory and the opt/delft3d-files should go in the </opt/delft3d> directory.

If you do not wish to install Delft3D in directory </opt> you have to alter the *profile* and *ld.so.conf.d* files manually by changing occurrences of */opt/delft3d* to the directory you installed Delft3D. For example:

```
% sed -i s#/opt/delft3d#/usr/local/delft3d# /etc/profile.d/delft3d.sh /etc/ld.so.conf.d/delf
```

### 4.3.2 Installation Tutorials on Linux

Make sure there is enough disk space for the installation of Delft3D. The complete Delft3D package uses approximately 1.5 Gb free disk space.

Switch to the directory where the tutorial rpm file is located, for example:

```
% cd /mnt/cdrom
```

Make sure you have sufficient rights:

```
% su
```

Install the rpm files with the rpm command:

```
# rpm -ivh Delft3D-tutorials-$VERSION-$RELEASE.$ARCH.rpm
```

### 4.3.3 Installation of MATLAB Compiler Runtime

To install the MATLAB Compiler Runtime you need the following file <MCRInstaller.bin>. The file is located on the install medium.

◇ Go to the directory where the <MCRInstaller.bin> file is located, for example:
  ```
  % cd /mnt/cdrom
  ```
◇ Make sure you got sufficient privileges:
  ```
  % su
  ```
◇ Start the installation with the command:
  ```
  # MCRInstaller.bin
  ```
  or start with the command
  ```
  # MCRInstaller.bin -console
  ```
  to run it as a console application.

After starting the following text will be displayed in your command-terminal and an installation window will appear.
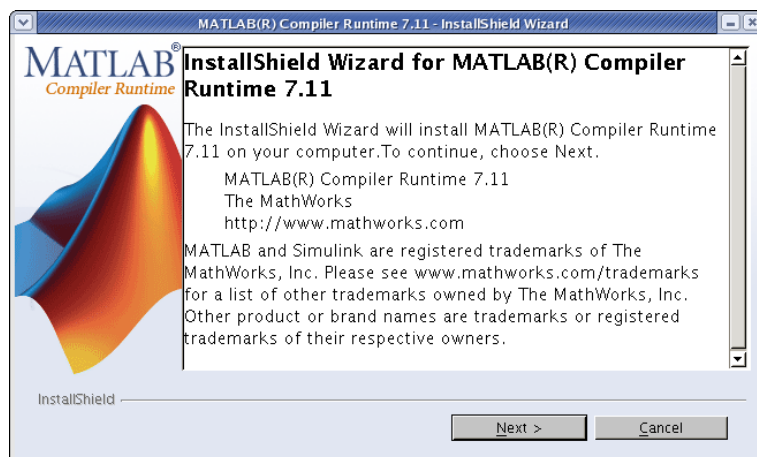

*Figure 4.2: Opening window of the MCRInstaller*

You can leave the installation by pressing the *Cancel* button.

Default, the MATLAB Compiler Runtime will be installed on the </opt/MATLAB/MATLAB_Compiler_Runtime> directory, you can change the default if you wish. For this manual we have changed the installation directory, see Figure 4.3, to </u/mooiman/linux/opt/MATLAB/MATLAB_Compiler_Runtime>.

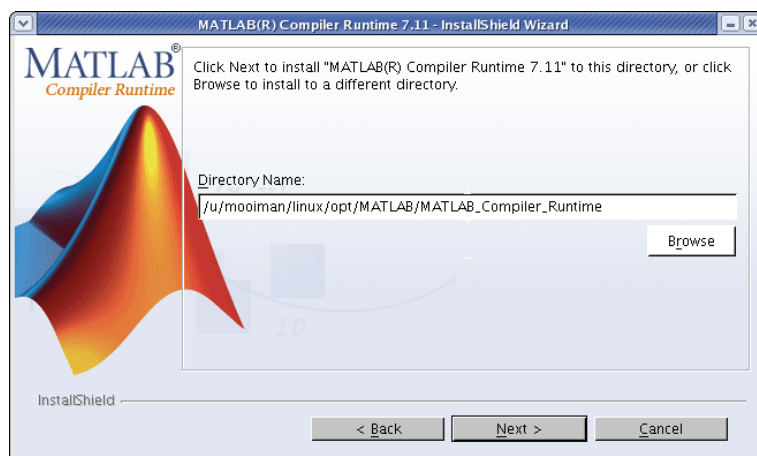

*Figure 4.3: Local installation directory*

◇ Press *Next* to proceed the installation.

Now a report is given about the installation, Figure 4.4.

◇ Press *Next* to continue the installation or press *Back* to go to the previous window.
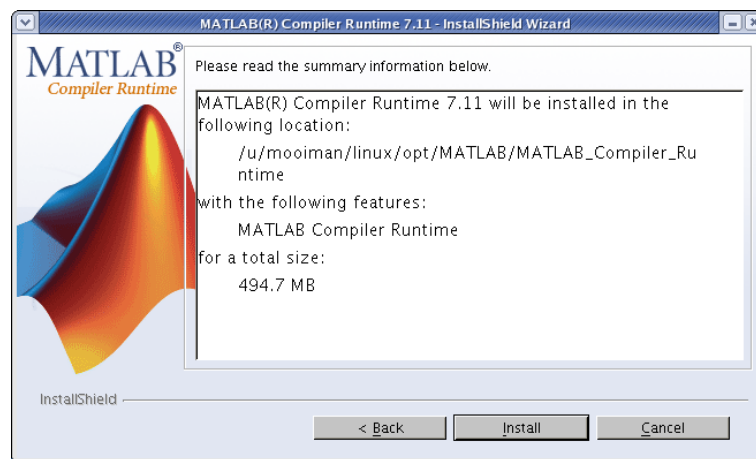

*Figure 4.4: Installation report*

◇ Press *Install* to start the installation.

A progress window shows up in which the installation is monitored, see Figure 4.5. The installation takes several minutes.

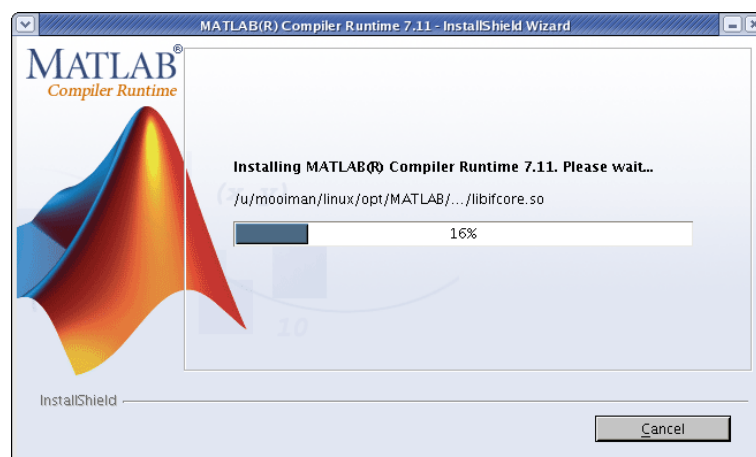

*Figure 4.5: Progressbar of the installation*

When the installation is finished, Figure 4.6 appears.
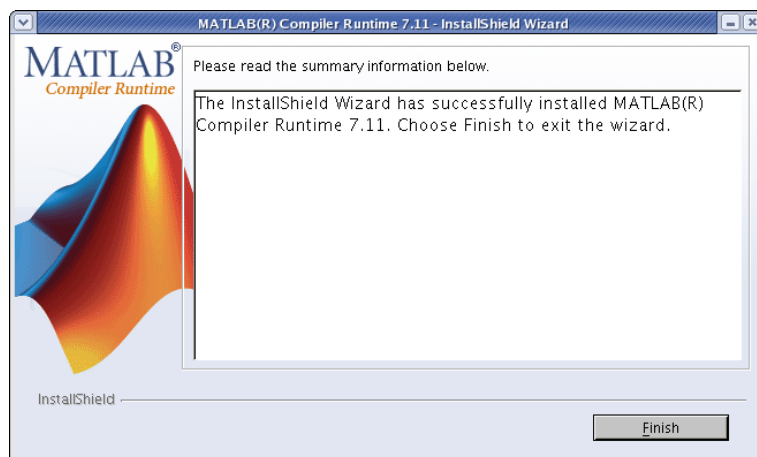

*Figure 4.6: Succesfully installed*

◇ Press *Finish* to exit the installation set-up.
The window will close and you are back on the command-prompt, see Figure 4.7

*Figure 4.7: Command prompt after installation of the MATLAB Compiler Runtime*

◇ Close your super-user session:
```
# exit
```

**Checking the Delft3D environment variables**

To check the environment variables type the following command (bash-shell).

```
% env
```

Amongst the environment variables displayed, the Delft3D variables should have proper values:

◇ `$D3D_HOME`: Pointing to the pre-defined "Delft3D home" directory (e.g. </opt/delft3d>)
`D3D_HOME=/opt/delft3d`
◇ `$ARCH`: Pointing to the architecture directory
`ARCH=intel`
◇ `$DHSDELFT_LICENSE_FILE`: e.g. </opt/delft3d>
This environment variable is needed for the license variable

```
[test@fbux-vm-rhel4 opt]$ ls
delft3d
[test@fbux-vm-rhel4 opt]$ cd delft3d
[test@fbux-vm-rhel4 delft3d]$ ll
total 40

drwxr-xr-x    5 root root  4096 Mar 20 10:44 doc
drwxr-xr-x   14 root root  4096 Mar 20 10:44 intel
drwxr-xr-x    3 root root  4096 Feb  5 13:02 matlab
[test@fbux-vm-rhel4 delft3d]$ █
```

***Figure 4.8:*** *<delft3d> directory with directory <doc> (Manuals, Tutorial, Release Notes) and system directory <intel>*

```
DHSDELFT_LICESE_FILE=/opt/delft3d
```
◇ `$PATH`: The PATH environment variable specifies a search path for executables of Delft3D
```
PATH=${PATH}:${D3D_HOME}/${ARCH}:
${D3D_HOME}/${ARCH}/gpp/bin:
${D3D_HOME}/${ARCH}/flow/bin:
${D3D_HOME}/${ARCH}/part/bin:
${D3D_HOME}/${ARCH}/util:
${D3D_HOME}/${ARCH}/waq/bin:
${D3D_HOME}/${ARCH}/wave/bin
```
◇ `$LD_LIBRARY_PATH`: The LD_LIBRARY_PATH environment variable specifies a search path for shared libraries which are needed by Delft3D
```
LD_LIBRARY_PATH=${LD_LIBRARY_PATH}:${D3D_HOME}/${ARCH}/lib
```
◇ `$UIDPATH`: This environemnt variable is needed for the GUI's.
```
UIDPATH=${UIDPATH}:${D3D_HOME}/${ARCH}/gpp/bin:
${D3D_HOME}/${ARCH}/flow/bin:
${D3D_HOME}/${ARCH}/part/bin:
${D3D_HOME}/${ARCH}/waq/bin:
${D3D_HOME}/${ARCH}/wave/bin
```

## 4.4 Manuals and release notes

As part of the installation also the User Manuals and Release Notes will be installed. They will be available in the directory where you installed Delft3D. See Figure 4.8.

After installation the Delft3D folder contains:

◇ Directory <intel>, containing the Delft3D system files.
◇ Directory <doc>, containing the Tutorials. User Manuals and Release Notes for all modules in PDF-format.

## 4.5 Example scripts to run modules outside the MENU

The example scripts are located in directory <delft3d/intel/scripts>.

## 4.6 How to remove an existing Delft3D installation

If required, remove an old Delft3D version by typing:

```
% rpm -e Delft3D
```

# 5 Frequently asked questions for Delft3D

## 5.1 QUICKPLOT: Could not find version 8.2 of the MCR

The MATLAB runtime environment will be installed on (default installation):

```
c:\Program_Files\MATLAB\MATLAB_Compiler_Runtime\v82
```

As part of the Matlab Compiler Runtime installation (<MCR_R2013b_win64_installer.exe>) the path to the directory

```
c:\Program_Files\MATLAB\MATLAB_Compiler_Runtime\v82\runtime\win64
```

should be added to the Windows environment variable `PATH`.

If this path is not added to the environment variable `PATH` then QUICKPLOT gives the following message, see Figure 5.1:

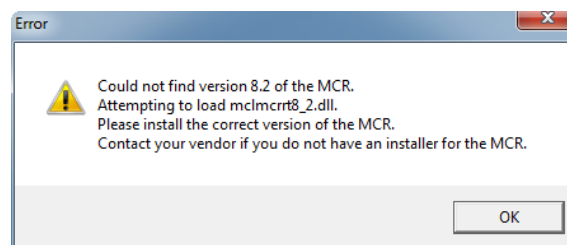

*Figure 5.1: QUICKPLOT could not find version 8.2 of the MCR*

in that case you have to add the directory to the `PATH` environment variable, i.e.:

```
PATH="c:\Program_Files\MATLAB\MATLAB_Compiler_Runtime\v82\runtime\win64";%PATH%
```

## 5.2 Authorisation error of Delft3D

Suppose you get the error shown in Figure 5.2:

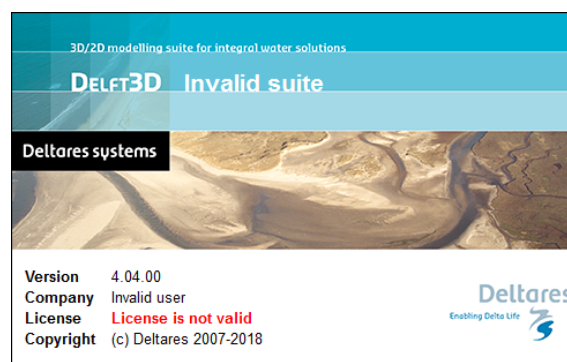

*Figure 5.2: Error window for unauthorised use of Delft3D*

Check your license file first if you are authorised to use the module. Look in the DS_Flex folder for <*.lic> files and check if the FEATURE for the specific module occurs in one of the license files.

If not found, and your License Agreement states the use of this module, contact the Helpdesk at delft3d.support@deltares.nl.

If not found, and your License Agreement does not state the use of this module, you are not authorised to use this functionality. If you are interested in the module or functionality, please contact the Sales Manager at delft3d.sales@deltares.nl

## 5.3 Module termination with unclear message

If an application ends abnormal with unclear messages, please contact the Helpdesk if you have a Maintenance and Support contract. Report the Delft3D and the module version numbers and send all input files with a description of the error.

# C Example of a log file

```
12:06:08 (lmgrd) -----------------------------------------------
12:06:08 (lmgrd)   Please Note:
12:06:08 (lmgrd)
12:06:08 (lmgrd)   This log is intended for debug purposes only.
12:06:08 (lmgrd)   In order to capture accurate license
12:06:08 (lmgrd)   usage data into an organized repository,
12:06:08 (lmgrd)   please enable report logging. Use Macrovision's
12:06:08 (lmgrd)   software license administration  solution,
12:06:08 (lmgrd)   FLEXnet Manager, to  readily gain visibility
12:06:08 (lmgrd)   into license usage data and to create
12:06:08 (lmgrd)   insightful reports on critical information like
12:06:08 (lmgrd)   license availability and usage. FLEXnet Manager
12:06:08 (lmgrd)   can be fully automated to run these reports on
12:06:08 (lmgrd)   schedule and can be used to track license
12:06:08 (lmgrd)   servers and usage across a heterogeneous
12:06:08 (lmgrd)   network of servers including Windows NT, Linux
12:06:08 (lmgrd)   and UNIX. Contact Macrovision at
12:06:08 (lmgrd)   www.macrovision.com for more details on how to
12:06:08 (lmgrd)   obtain an evaluation copy of FLEXnet Manager
12:06:08 (lmgrd)   for your enterprise.
